# NEO

# WEBSITE REVISION MASTER DOCUMENT

Developer Implementation & Website Refinement Brief

| | |
|---|---|
| Project | PT Neomedika Elektra Optima (NEO) Corporate Website |
| Current Website | |
| Document Type | Website Revision & Implementation Specification |
| Version | 1.0 — Draft for Developer |
| Date | 4 November 2026 |
| Status | For Implementation |

Connecting Healthcare. Empowering Better Lives.

# 1. Project Overview

## 1.1 Project Objective

The objective of this revision is to refine the existing NEO corporate website into a premium, credible, professional, and internationally positioned corporate website.

The website must communicate NEO as an integrated healthcare technology company with a broader business vision beyond a single digital product.

- NEO as the corporate brand and business platform.
- Five strategic business pillars.
- KHAYR as NEO's flagship digital dental healthcare platform, currently under development and validation.
- Neolyte as part of NEO's healthcare hygiene product portfolio, subject to verification of product documentation and current commercial status.
- NEO's technology approach, innovation strategy, and partnership opportunities.

## 1.2 Corporate Positioning

| Item | Approved Direction |
|---|---|
| Corporate Name | PT Neomedika Elektra Optima |
| Corporate Brand | NEO |
| Corporate Descriptor | Integrated Healthcare Technology |
| Primary Tagline | Connecting Healthcare. Empowering Better Lives. |

NEO is an integrated healthcare technology company focused on developing digital platforms, healthcare management systems, and connected solutions for the evolving healthcare ecosystem.

## 1.3 Brand Architecture

**PT Neomedika Elektra Optima → NEO (corporate brand) → Portfolio: KHAYR and Neolyte.**

- KHAYR is a flagship product under NEO, not a separate parent company.
- Neolyte is a product line within NEO's portfolio.
- Do not present KHAYR or Neolyte as separate corporate entities unless approved by NEO.

# 2. General Implementation Principles

## 2.1 Accuracy Before Marketing Claims

All public statements must reflect the actual status of NEO's business, products, technology, and partnerships. Distinguish existing operational capabilities, products under development, planned features, proposed integrations, potential partnerships, and verified regulatory approvals or certifications.

## 2.2 Corporate Website, Not Product Application

The NEO website is a corporate website and business-development platform. It is not a KHAYR clinic application, patient portal, clinical record system, internal enquiry database, or public administration dashboard. Internal functions must be separated from the public website.

## 2.3 International Corporate Presentation

English is the default language, with an Indonesian alternative. Both language versions must be complete, consistent, and professionally reviewed.

### 2.4 Maintain Existing Design Foundation

- Retain NEO brand identity, purple-magenta direction, clean corporate layout, modern typography, and suitable card components.
- Improve visual hierarchy, spacing, readability, corporate credibility, product presentation, page consistency, mobile experience, and CTA placement.
- Refine the existing design rather than rebuilding everything without a clear reason.

# 3. Final Website Structure

1. Home
2. About NEO
3. Our Business
4. Our Products (KHAYR and Neolyte)
5. Technology
6. Partnerships
7. Insights
8. Contact

Our Products should contain two product pages: KHAYR and Neolyte. The footer must include corporate identity, official contact details, Privacy Notice, Terms of Use, Cookie Policy, and copyright information.

# 4. Page-by-Page Revision Specification

## PAGE 01 — HOME

### Objective

Introduce NEO immediately as an integrated healthcare technology company. The first screen must answer what NEO is, what it develops, and what a prospective partner can do next.

### Section 1 — Hero

**Headline: Connecting Healthcare. Empowering Better Lives.**

PT Neomedika Elektra Optima (NEO) is an integrated healthcare technology company focused on developing digital platforms, healthcare management systems, and connected solutions for the evolving healthcare ecosystem.

Through purposeful technology, responsible innovation, and strategic collaboration, NEO aims to help healthcare organisations build more connected, efficient, and sustainable operations.

Primary CTA: Explore Our Solutions  Secondary CTA: Partner With NEO

### Design Requirements

- Premium corporate appearance; clear prominent headline; concise, readable hero copy.
- Relevant healthcare technology visual; avoid generic stock illustrations as the dominant visual.
- Primary CTA visible without excessive scrolling; balanced text-to-image ratio.

### Section 2 — Who We Are

**Building Technology for a More Connected Healthcare Ecosystem.**

NEO brings together healthcare knowledge, digital technology, and operational innovation to develop solutions that address the evolving needs of healthcare organisations. Our approach focuses on practical technology, connected workflows, responsible data management, and long-term collaboration across the healthcare ecosystem. CTA: Discover NEO.

### Section 3 — Our Business Pillars

Display: Healthcare Management Systems; Digital Healthcare Platforms; Integration & Interoperability; Healthcare Intelligence & Automation; Healthcare Ecosystem & Connectivity.

Clarification: NEO's five strategic pillars represent its business architecture and long-term development direction. Specific solutions and capabilities are introduced progressively as they are developed and validated.

### Section 4 — Featured Products

KHAYR — Digital Dental Healthcare Platform. A cloud-based Dental Practice Operating System being developed to connect clinical, administrative, financial, and operational workflows within dental practices. Status: Under Development & Validation. CTA: Explore KHAYR.

Neolyte — Healthcare Hygiene Products. A healthcare hygiene product line featuring Neolyte SN and Neolyte DS, subject to verified product specifications, regulatory documentation, and current commercial availability. CTA: Explore Neolyte.

### Sections 5–8

Technology: Technology Designed Around Real Healthcare Needs. Explain integration, scalability, responsible data management, security by design, and practical healthcare workflows. CTA: Explore Our Technology.

Partnership: Building the Future of Healthcare Through Collaboration. Invite healthcare providers, technology companies, clinical professionals, distributors, and institutions to explore collaboration. CTA: Become a Partner.

Insights: Display up to three featured articles. CTA: Explore All Insights.

Closing CTA: Let's Build a More Connected Healthcare Future. Invite corporate, product, and partnership enquiries. CTA: Contact NEO.

## PAGE 02 — ABOUT NEO

### Page Introduction

**About NEO — Developing Technology. Connecting Healthcare.**

PT Neomedika Elektra Optima (NEO) is an integrated healthcare technology company focused on developing digital platforms, management systems, and connected solutions for the evolving healthcare ecosystem. NEO combines technology development, healthcare-oriented innovation, and strategic collaboration to support the transformation of healthcare operations.

### Who We Are

Healthcare is evolving through digitalisation, changing patient expectations, increasing operational complexity, and the growing need for connected information systems. NEO aims to contribute to this transformation by developing practical technology platforms and solutions that connect healthcare workflows, support better management, and enable more efficient operations. Our corporate direction extends beyond a single product, with a long-term focus on building a connected healthcare technology portfolio.

### Vision

To become a trusted healthcare technology company, connecting healthcare systems, enabling responsible innovation, and contributing to a more accessible and integrated healthcare ecosystem.

### Mission

- Develop practical technology solutions for healthcare organisations.
- Connect clinical, administrative, and operational workflows.
- Promote responsible data exchange and interoperability.
- Build long-term partnerships across the healthcare ecosystem.
- Develop scalable platforms guided by real healthcare needs.

### Corporate Values

- Innovation — Developing thoughtful solutions to address real healthcare challenges.
- Integrity — Building trust through responsible practices, transparency, and accountability.
- Collaboration — Working with healthcare professionals, institutions, and technology partners.
- Responsibility — Recognising patient safety, data protection, and healthcare standards.

• Long-Term Thinking — Building sustainable solutions and partnerships for the future of healthcare.

### Development Approach

1. Understand Healthcare Needs.
2. Design Practical Solutions.
3. Develop Technology Platforms.
4. Validate Clinical and Operational Workflows.
5. Build Strategic Partnerships and Scale.

**Do not invent corporate history, founding date, office locations, leadership biographies, or international operating presence. Use actual corporate information only when verified and approved.**

## PAGE 03 — OUR BUSINESS

Headline: Our Business — Five Strategic Pillars. One Connected Healthcare Vision.

NEO's business strategy is structured around five strategic pillars designed to address the evolving requirements of healthcare organisations and the broader healthcare ecosystem.

| Pillar | Scope and Focus |
|---|---|
| 01 Healthcare Management Systems | Healthcare administration; practice management; operational workflows; financial and administrative visibility; multi-location management. |
| 02 Digital Healthcare Platforms | Digital dental healthcare; clinical workflow platforms; patient administration; digital healthcare services; connected care experiences. KHAYR is the flagship platform under development. |
| 03 Integration & Interoperability | API integration; data exchange architecture; interoperability planning; system connectivity; standards-aware development. Do not imply integrations are operational unless verified. |
| 04 Healthcare Intelligence & Automation | Operational analytics; management reporting; workflow automation; data-informed decision support; future intelligence capabilities. Do not claim clinical AI or automated diagnosis unless developed, validated, and approved. |
| 05 Healthcare Ecosystem & Connectivity | Technology partnerships; healthcare provider collaboration; distribution channels; institutional cooperation; ecosystem development. |

Required disclaimer: NEO's five strategic pillars represent its business architecture and long-term development direction. Specific products, services, integrations, and capabilities are introduced progressively, subject to development, validation, and operational readiness.

## PAGE 04 — OUR PRODUCTS: KHAYR

### Positioning and Introduction

**KHAYR — Building a More Connected Dental Practice.**

KHAYR is a cloud-based Dental Practice Operating System being developed by PT Neomedika Elektra Optima. The platform is designed to bring together clinical documentation, digital odontograms, patient administration, appointment management, billing, inventory, and operational insights within a connected environment. KHAYR aims to support dental practices in managing their clinical and administrative workflows through a structured digital platform.

### Product Vision

A connected digital operating environment for modern dental practices.

## Planned Product Modules

1. Clinical Management & Dental EMR
2. Digital Odontogram & Treatment Planning
3. Patient Relationship Management
4. Appointment & Scheduling Management
5. Billing & Financial Management
6. Inventory & Procurement
7. Clinic & Multi-Branch Management
8. Operational Reporting & Analytics

## Product Development Principles

- Structured patient records.
- Clinical workflow consistency.
- Clear patient and encounter context.
- Responsible data management.
- User permissions and auditability.
- Practical dental practice workflows.
- Scalable architecture.

## Concept UI Preview

Every product screenshot must display: Concept UI — Illustrative Product Preview. All demo patient information must be synthetic. Do not display real patient names, actual NIK numbers, real medical records, or identifiable patient information. Do not imply that a concept screen is a production-ready application.

## Claims to Remove Until Validated

- 40% Admin Time Saved.
- 3× Patient No-Show Reduction.
- 99.4% Record Accuracy.
- Zero Duplicate EMR Records.
- Real-time synchronisation, if not implemented and tested.
- Any other quantified performance claim without supporting evidence.

Replace with: Structured Clinical Documentation; Connected Patient Workflows; Centralised Practice Management.

## SATUSEHAT and Interoperability

### Interoperability Development Roadmap

KHAYR's development roadmap considers healthcare data interoperability and relevant Indonesian healthcare standards. Specific integrations remain subject to technical development, validation, and applicable approval requirements. Do not display SATUSEHAT as a live integration unless implemented and verified.

## KHAYR Voucher Promotion

If retained, title it Proposed Digital Voucher Distribution Ecosystem. Disclosure: Potential distribution channels and partner integrations are subject to commercial agreements, technical validation, and partner approval. Do not display partner logos or state that vouchers are automatically distributed unless relationships and integration are confirmed.

CTA: Register Your Interest | Request Product Information. Avoid 'Open Product Portal' or 'Schedule Live Demo' if the product is not ready for a genuine live demonstration.

Product status disclosure: KHAYR is currently under development and validation by PT Neomedika Elektra Optima. Product scope, features, integrations, commercial availability, and release timing remain subject to development progress, technical validation, and operational readiness.

# PAGE 05 — OUR PRODUCTS: NEOLYTE

### Positioning

**Neolyte Healthcare Hygiene Solutions**

Neolyte is part of NEO's healthcare hygiene product portfolio, featuring Hypochlorous Acid (HOCl)-based formulations. The product portfolio includes Neolyte SN — Hand & Body Sanitizer, and Neolyte DS — Surface & Equipment Disinfectant. Product information, applications, and specifications must follow relevant approved product documentation and applicable regulatory requirements.

### Product Pages

Neolyte SN: Hand & Body Sanitizer. Display only verified intended use, specifications, active ingredient information, packaging, applicable registration details, and official instructions for use.

Neolyte DS: Surface & Equipment Disinfectant. Display only verified intended use, specifications, active ingredient information, approved application areas, packaging, applicable registration details, and official instructions for use.

### Product Documentation & Laboratory Verification

- Exact product name; registration/permit number; registration holder; product classification; validity/current status; approved-use scope.
- Laboratory name; test report number; test method and standard; organisms tested; concentration; contact time; test date; reported results.

### Claims Requiring Removal or Verification

- 100% Safe; Baby Safe; Food Grade; Non-Toxic; Non-Irritating.
- Kills 99.99% of All Pathogens; 100 Times More Effective Than Bleach.
- Sterilises Food; Safe for All Humans, Pets, and Environments.
- EPA/CDC Approved or wording that implies approval of the specific product.

Distinguish antiseptic, sanitizer, disinfectant, sterilization, food-contact application, surface disinfection, and skin application. These terms must not be used interchangeably.

### Product Dilution Calculator

Retain only if all dilution ratios, starting concentration, calculations, and application instructions are verified and approved. The calculator must not recommend uses outside official product instructions and must direct users to the official product label.

CTA: Product Enquiry | Request Product Documentation.

Product specifications, availability, approved applications, regulatory documentation, and distribution arrangements should be confirmed with NEO before publication or commercial use.

# PAGE 06 — TECHNOLOGY

**Technology Built Around Real Healthcare Needs.**

NEO's technology strategy focuses on developing adaptable digital platforms that support clinical workflows, healthcare administration, responsible information exchange, and operational intelligence. Our approach is guided by practical healthcare requirements, scalable architecture, and responsible technology development.

| Principle | Description |
|---|---|
| 01 Integration by Design | Developing technology with consideration for connected healthcare workflows and system integration requirements. |
| 02 Scalable Architecture | Designing platforms with the potential to evolve as healthcare organisations and operational requirements grow. |
| 03 Security by Design | Considering security, access control, and information protection throughout product development. |

| Principle | Description |
|---|---|
| 04 Responsible Data Management | Recognising confidentiality, accountability, and applicable privacy requirements. |
| 05 Standards-Aware Interoperability | Considering relevant data standards and interoperability requirements when developing healthcare platforms. |
| 06 Human-Centred Product Validation | Prioritising practical user workflows and validation with relevant healthcare stakeholders. |

Use present-tense statements only for implemented and verified capabilities. For planned capabilities use: Designed to support; Planned capability; Under development; Part of the technology roadmap; Subject to technical validation.

**Do not claim encryption at rest/in transit, 256-bit TLS, complete security compliance, full regulatory compliance, live interoperability, operational API integrations, or independent security certification unless confirmed.**

Technology capabilities, integrations, and security controls vary by product and development stage. Specific implementations are subject to technical validation, deployment configuration, and applicable requirements.

## PAGE 07 — PARTNERSHIPS

### Building Strategic Partnerships Across Healthcare.

We believe meaningful healthcare innovation requires collaboration across healthcare providers, technology companies, clinical professionals, distributors, and institutions. NEO welcomes opportunities to explore partnerships that support technology development, healthcare operations, and long-term ecosystem growth.

| Category | Potential Collaboration |
|---|---|
| Healthcare Providers | Product feedback; clinical workflow validation; digital transformation initiatives; multi-location management requirements. |
| Technology Partners | Technology integration; infrastructure development; interoperability; digital platform connectivity. |
| Distribution Partners | Product distribution; regional market development; product implementation; commercial collaboration. |
| Clinical & Institutional Partners | Clinical advisory; product validation; research collaboration; strategic development. |

CTA: Discuss Partnership Opportunities. Do not display any organisation's logo or identify it as an official NEO partner unless the relationship and permission to use its brand are confirmed. Use 'Potential Partners', 'Partnership Opportunities', or 'Areas of Collaboration' where relationships are not formalised.

## PAGE 08 — INSIGHTS

### Insights & Perspectives

Explore perspectives on digital healthcare, dental technology, healthcare management, interoperability, and responsible innovation.

- Digital Healthcare.
- Dental Technology.
- Healthcare Hygiene.
- Interoperability & Integration.
- Corporate & Industry Perspectives.

Each article must contain a clear headline, publication date, author/editorial attribution, category, relevant cover image, complete article content, references for scientific or regulatory claims, related article links, and SEO metadata. Do not publish placeholder or empty article pages.

## PAGE 09 — CONTACT

**Let's Start a Conversation With NEO.**

Whether you are exploring healthcare technology, requesting product information, considering distribution opportunities, or discussing strategic partnerships, we welcome the opportunity to connect.

Form title: Corporate Enquiry & Partnership Form

Required fields: Full Name; Business / Institutional Email; Enquiry Category; Product / Solution Interest; Message / Requirements.

Optional fields: Phone / WhatsApp Number; Clinic / Hospital / Organisation; City / Country.

Enquiry categories: Corporate & General Enquiry; KHAYR Product Information; Neolyte Product Enquiry; Technology & Integration Partnership; Distribution Partnership; Investor & Strategic Collaboration.

Consent: I acknowledge that PT Neomedika Elektra Optima may collect and process the business contact information submitted through this form to respond to my enquiry, in accordance with its Privacy Notice. Link 'Privacy Notice' to the actual published privacy policy.

Submit button: Submit Enquiry

Success: Thank you for contacting NEO. Your enquiry has been received. Our team will review your request and get back to you.

Error: We could not submit your enquiry at this time. Please try again later or contact NEO through the official contact details provided.

**Mandatory removal from public Contact page: NEO System Incoming Enquiry Database; public enquiry record count; Download CSV Backup; internal submission table; internal administrative controls; any database or system status information. These functions must never be accessible to unauthenticated public visitors.**

# 5. Contact Form — Technical Requirements

## 5.1 Data Handling

- Validate all submitted fields server-side and sanitise user input.
- Prevent spam and automated submissions; apply rate limiting.
- Use secure server-side credentials; do not expose API keys in frontend code.
- Store only necessary enquiry information; restrict database access to authorised personnel.
- Provide backup and recovery procedures.

## 5.2 Google Sheets and Gmail

- Use secure server-side authentication; do not expose Google credentials or service account keys.
- Restrict Google Sheets access and avoid public sharing permissions.
- Handle email dispatch securely and avoid unnecessary sensitive information in email.
- Log errors and failed submissions. Do not describe the integration as operational until implemented and tested.

## 5.3 Admin Dashboard

- Authentication required; role-based access; restricted enquiry records.
- Secure CSV export; audit logging; no public access.
- Session management, logout, and protection against unauthorised access.
- Separate the public website and internal admin interface logically and securely.

### 5.4 Patient Data Protection

The corporate enquiry form must not collect patient medical records, clinical photographs, NIK numbers, or other sensitive patient health information. Display: Please do not submit patient medical records or sensitive health information through this corporate enquiry form.

# 6. Footer Revision

### Corporate Identity

PT Neomedika Elektra Optima | NEO — Integrated Healthcare Technology | Connecting Healthcare. Empowering Better Lives.

### Official Contact

Replace the personal Gmail address with an approved corporate email address using NEO's official domain. Suggested structure: info@official-domain; corporate@official-domain; partnerships@official-domain; business@official-domain. Use only verified official contact details.

### Location and Legal

Display only verified office addresses or actual business locations. Do not present cities as official office locations if NEO does not have an office there. Legal links must open actual documents or pages, not empty placeholders.

### Corporate Disclaimer

The information on this website describes PT Neomedika Elektra Optima's corporate direction, business framework, and product portfolio. KHAYR is currently under development and validation. Product features, integrations, and commercial availability are subject to development progress and operational readiness. Product specifications, approved applications, registration information, and commercial availability for Neolyte products are subject to applicable documentation and verification.

© 2026 PT Neomedika Elektra Optima (NEO). All rights reserved.

# 7. Visual Identity & Design System

### 7.1 Brand Colours

| Colour | Hex | Suggested Application |
|---|---|---|
| Magenta | #EE498E | CTA, emphasis, selected accents. |
| Purple | #903595 | Secondary elements and section highlights. |
| Deep Purple | #342077 | Primary headings, navigation, key text. |
| White / Soft Grey | Neutral | Background and content sections. |

Do not introduce additional dominant colours without approval.

### 7.2 Typography

Use one primary type family consistently: Inter or Manrope. Suggested desktop sizes: H1 44–56 px; H2 32–40 px; H3 22–26 px; body 16–18 px; caption 13–14 px. Maintain readability on mobile.

### 7.3 Layout

- Consistent content width and section spacing.
- Avoid overly dense cards; consistent border radius.

- Subtle shadows only where appropriate.
- Consistent CTA styling; avoid excessive animation; sufficient contrast.

### 7.4 Images

Prioritise actual NEO corporate imagery, KHAYR product concept screens, actual Neolyte product photography, relevant healthcare environment photography, and technology/workflow illustrations. Do not use images that falsely imply ownership, partnerships, certifications, or operating facilities.

## 8. Responsive Design Requirements

| Viewport | Required Test |
|---|---|
| Desktop | 1440 px and 1280 px |
| Tablet | 768 px |
| Mobile | 390 px and 360 px |

- Navigation works on mobile; no horizontal overflow; readable text.
- Images scale correctly; cards stack appropriately; forms are easy to complete.
- CTA buttons are accessible; footer columns adapt to smaller screens.
- Developer provides desktop and mobile screenshots.

## 9. SEO and Website Performance

### SEO

- Unique page titles and meta descriptions.
- Canonical URLs and Open Graph metadata.
- Appropriate heading hierarchy and descriptive image alt text.
- XML sitemap and robots.txt.
- Structured data where appropriate; consistent internal links.

**Suggested homepage SEO title: NEO | Integrated Healthcare Technology**

Suggested homepage meta description: PT Neomedika Elektra Optima develops digital healthcare platforms, management systems, and connected solutions for the evolving healthcare ecosystem.

### Performance

- Optimised images and modern formats where supported.
- Lazy loading below the fold; efficient font loading.
- Minified production assets; appropriate caching and CDN delivery.
- Avoid unnecessary third-party scripts.
- Test Core Web Vitals and report results.

## 10. Security, Privacy and Legal Requirements

- HTTPS enabled.
- No sensitive credentials exposed in frontend source code.
- Contact form protected against spam and abuse.
- Admin functionality requires authentication.
- Database permissions appropriately restricted.
- Error messages do not expose internal system details.
- Privacy policy accurately describes actual data collection.
- Cookie policy reflects actual cookies and tracking technologies.

- Third-party integrations documented; data retention and deletion procedures defined.

Review the website against applicable Indonesian personal data protection requirements before launch. Do not claim blanket compliance or certification unless independently reviewed and confirmed.

# 11. Developer Implementation Priorities

| Priority | Required Work |
|---|---|
| P0 — Critical | Remove public enquiry database and CSV export; secure enquiry database/admin access; remove unsupported KHAYR statistics; review Neolyte safety/efficacy claims; verify registration/certification references; remove unverified partner integration claims; correct SATUSEHAT/technology wording; prevent collection of patient health data. |
| P1 — High | Revise homepage positioning, KHAYR page, Technology page, About NEO, and Partnerships; replace personal Gmail; complete privacy/legal pages; verify corporate contact information; label concept UI and demo data. |
| P2 — Medium | Improve navigation, typography, spacing, product imagery, Our Business presentation, Insights quality, mobile layout, and CTA consistency. |
| P3 — Final QA | Test links, CTAs, form, notifications, data storage/access restrictions, responsive design, SEO, accessibility, browser compatibility, and security. |

# 12. Acceptance Criteria

## Corporate Positioning

- NEO is clearly presented as the corporate brand.
- KHAYR and Neolyte are correctly presented as portfolio products.
- Five business pillars are clearly communicated.
- No unverified corporate claims are published.

## Product Accuracy

- KHAYR is clearly labelled under development and validation.
- KHAYR concept screens are labelled illustrative previews.
- Unsupported performance statistics are removed.
- SATUSEHAT is not presented as a live integration unless verified.
- Neolyte claims match approved and verified documentation.

## Contact and Security

- Public visitors cannot access enquiry records or CSV backups.
- Admin functions require authentication.
- Contact form submission works; email notification works if configured.
- Privacy consent links to the actual Privacy Notice.
- No sensitive patient data is requested through the form.

## Design and Usability

- Desktop and mobile layouts function; no horizontal overflow.
- Navigation and all CTA buttons work.
- Typography is readable; public pages have consistent styling.

### SEO and Technical

- Page titles and descriptions configured; sitemap available; HTTPS works.
- Production assets optimised; Core Web Vitals tested.
- No critical browser console errors remain.

# 13. Developer Handover Requirements

1. Updated production website URL.
2. Updated source code repository.
3. List of all pages and routes.
4. List of implemented features.
5. Contact form architecture and data flow.
6. Database and admin access documentation.
7. Google Sheets/Gmail integration documentation, if used.
8. Environment variable documentation without exposing secrets.
9. Deployment and rollback instructions.
10. Backup and recovery procedures.
11. SEO configuration summary.
12. Security implementation summary.
13. Desktop and mobile screenshots.
14. Outstanding issues and known limitations.
15. Final QA report.

All credentials must be transferred securely and must not be included in public source code or ordinary documentation.

# 14. Final Instruction to Developer

This revision is not intended to change NEO's corporate direction or replace the existing website design entirely. The objective is to transform the current website into a more credible, premium, professional, and internationally positioned corporate website.

The developer should retain the existing NEO visual identity while substantially improving corporate messaging, product accuracy, technical presentation, website usability, and security.

**The final website must communicate ambition without exaggeration, innovation without unsupported claims, and corporate credibility through accuracy, clarity, and professional execution.**

End of Document.
