NEO

INTEGRATED HEALTHCARE TECHNOLOGY

Website Concept & Corporate Positioning

International positioning, brand architecture, audiences, messaging and scope

Purpose
Practical working brief for NEO's design, webmaster, content and development teams.

Working document | 02 November 2026

1. Strategic direction

NEO's corporate website must position PT Neomedika Elektra Optima as an international-minded integrated healthcare technology company. It should communicate a long-term corporate platform and portfolio strategy, rather than presenting NEO as a single-product dental software vendor.

Approved direction: INTERNATIONAL positioning • NEO-based domain strategy • PREMIUM corporate website scope.

The website is a corporate trust and business-development asset. It is not the KHAYR application, a patient portal, or a substitute for product documentation and regulatory disclosures.

2. Brand architecture

Brand layer	Role	Website treatment
NEO	Corporate brand and company identity	Primary identity across the site; communicates strategy, capabilities, partnerships and corporate direction.
KHAYR	Flagship digital dental healthcare platform	Featured product under NEO; clearly label development-stage status.
NEOLYTE	Historical healthcare hygiene product line	Include selectively as portfolio heritage; verify current availability, technical details and regulatory status before product claims.

Keep NEO broader than KHAYR. KHAYR should receive a prominent feature and dedicated product page, but must not dominate the corporate identity.

3. Audiences and user needs

Audience	Information required	Desired action
Healthcare providers	Understanding of healthcare workflows and relevant digital solutions	Explore solutions / enquire
Technology partners	Integration, platform and ecosystem collaboration opportunities	Start partnership discussion
Strategic partners	Long-term direction, corporate credibility and governance approach	Contact corporate team
Investors / stakeholders	Clear corporate identity, portfolio framework and credible disclosures	Request business discussion
Talent	Purpose and direction of the company	Explore careers when available

Do not imply international offices, customers, operations, regulatory approvals or partnerships unless supported by evidence and approved for publication.

4. Positioning and messaging

Corporate descriptor

Integrated Healthcare Technology

Primary tagline

Connecting Healthcare. Empowering Better Lives.

Core positioning statement

NEO is an integrated healthcare technology company focused on developing digital platforms, management systems and connected solutions for the evolving healthcare ecosystem.

Brand promise

Connecting people, technology and healthcare systems to enable better healthcare experiences and operations.

5. Five business pillars

• Healthcare Management Systems

• Digital Healthcare Platforms

• Integration & Interoperability

• Healthcare Intelligence & Automation

• Healthcare Ecosystem & Connectivity

These pillars describe NEO's strategic business framework. They must not be presented as five fully launched business units or commercially available services unless verified.

6. Experience principles and boundaries

• International corporate quality: restrained, confident, clear and evidence-led.

• Product clarity: distinguish corporate capabilities from individual product features.

• Trust before hype: explain purpose, approach, governance and limitations.

• Scalable content: CMS-managed pages and articles should support future portfolio growth.

• Bilingual consistency: English default, Indonesian professionally localised.

• Clear contact and partnership pathways; avoid intrusive pop-ups.

In scope: corporate pages, bilingual content, product discovery, enquiry forms, insights, SEO, analytics, security and responsive design. Out of scope: patient records, clinic workflows, KHAYR login, payment processing and patient health information.

7. Success and approval criteria

• Visitors can explain what NEO is within 10 seconds.

• Visitors distinguish NEO from KHAYR and understand KHAYR's development status.

• Five pillars are easy to find and understand.

• Qualified visitors can submit an enquiry in under two minutes.

• NEO can update pages and publish insights without developer intervention.

• No placeholder, draft feature, planned integration or unverified credential is published as fact.

Before launch: verify company particulars, logo, leadership, contacts, KHAYR status, NEOLYTE status, legal policies, domain and trademark position.
