NEO

INTEGRATED HEALTHCARE TECHNOLOGY

Website Content — Master Copy

Full English corporate website copy for all recommended pages

Purpose
Practical working brief for NEO's design, webmaster, content and development teams.

Working document | 02 November 2026

1. Editorial and publication rules

• Use this copy as the approved starting master; adapt only for layout and readability.

• Maintain the distinction between NEO corporate brand and KHAYR product brand.

• Use measured language for capabilities under development.

• Do not invent customer numbers, performance metrics, case studies, certifications or partnerships.

• Keep the KHAYR development-stage note near product claims and CTA.

• Translate into Indonesian with professional editorial review.

Use “is developing”, “is designed to”, “aims to” and “strategic direction” for planned capabilities. Use “available”, “integrated”, “certified” or “deployed” only when verified.

2. HOME

Hero

Connecting Healthcare. Empowering Better Lives.
We bring healthcare, technology and intelligent systems together to help create more connected, efficient and accessible healthcare experiences.
NEO is an integrated healthcare technology company focused on building digital platforms, management systems and connected solutions for the evolving healthcare ecosystem.

Introduction

Technology with a Purpose. Innovation for Better Healthcare.
Healthcare is evolving. As care delivery becomes increasingly connected and data-driven, healthcare organisations need technology that works across clinical, operational and administrative environments. NEO aims to bridge these needs through integrated technology, digital platforms and intelligent solutions designed around the people and organisations that make healthcare possible.

Our Business

Building the Foundations of Connected Healthcare.
NEO develops its business across five strategic pillars: Healthcare Management Systems; Digital Healthcare Platforms; Integration & Interoperability; Healthcare Intelligence & Automation; Healthcare Ecosystem & Connectivity.
CTA: Discover Our Business

Featured Product

KHAYR — A Smarter Way to Manage Dental Healthcare.
KHAYR is NEO's flagship digital dental healthcare platform, being developed to bring clinical, administrative, financial and patient-management workflows into a more connected environment. Designed around the needs of dental practices, KHAYR aims to support better visibility, more structured operations and coordinated practice management.
CTA: Explore KHAYR
Development-stage disclosure: KHAYR is under development. Features, integrations and availability are subject to product development and validation.

Technology & Innovation

Building Technology Around Real Healthcare Needs.
We believe healthcare technology should be purposeful, connected and adaptable. Our technology direction focuses on integrated digital platforms, interoperable systems and data exchange, secure and responsible information management, scalable technology architecture, and data intelligence and workflow automation.

Partnership

Better Healthcare Is Built Together.
We welcome conversations with healthcare providers, technology companies, institutions and strategic partners who share our ambition to advance healthcare through meaningful technology.
CTA: Start a Conversation

Closing CTA

Let's Build a More Connected Healthcare Future.
Connect with NEO to explore solutions, partnerships and opportunities.

3. ABOUT NEO

Page hero

Advancing Healthcare Through Connected Technology.
NEO is an integrated healthcare technology company focused on developing digital platforms, management systems and connected solutions for the healthcare industry. We bring together technology, operational understanding and an ecosystem-oriented approach to address the changing needs of healthcare organisations and the people they serve.

Who We Are

NEO was established with a long-term ambition to contribute to the transformation of healthcare through technology. Our approach extends beyond individual software products. We aim to develop a connected portfolio of capabilities that can support healthcare operations, digital service delivery, information exchange and intelligent decision-making. Our corporate strategy is built around scalable platforms, meaningful partnerships and solutions designed to evolve with healthcare needs.

Vision

To become a trusted international healthcare technology company, enabling a more connected, intelligent and accessible healthcare ecosystem.

Mission

• Develop purposeful digital healthcare solutions that address real operational and clinical needs.

• Connect healthcare systems, people and information through technology.

• Promote responsible innovation, interoperability and data-driven capabilities.

• Build long-term partnerships across the healthcare and technology industries.

• Develop scalable platforms that can evolve across markets and healthcare environments.

Values

Purpose — We focus on technology that creates meaningful value. Innovation — We continuously explore better ways to solve healthcare challenges. Integrity — We value transparency, accountability and responsible conduct. Collaboration — We believe progress is achieved through strong partnerships. Excellence — We pursue quality in our products, services and relationships. Adaptability — We design for a healthcare environment that is continuously changing.

Corporate direction

NEO is building a portfolio-led healthcare technology business. Its long-term direction is to develop complementary platforms and capabilities that can work independently or as part of a broader connected ecosystem. Corporate establishment date, registered address, legal registration details and leadership information: to be confirmed before publication.

4. OUR BUSINESS

Five Strategic Pillars. One Connected Healthcare Vision.
NEO's business is structured around five complementary pillars that form the foundation of its long-term healthcare technology strategy.

01 — Healthcare Management Systems

Technology designed to support the management and operation of healthcare organisations. Potential capability areas include practice and facility management, administrative workflows, operational reporting, resource and process management, and multi-location management.

02 — Digital Healthcare Platforms

Digital platforms designed to support interactions between healthcare providers, professionals and patients. Potential capability areas include digital practice platforms, patient engagement, clinical workflow support, digital service experiences and connected healthcare applications.

03 — Integration & Interoperability

Technology approaches designed to enable healthcare systems and information to communicate and work together. Potential capability areas include system integration, data exchange, API-based connectivity, interoperability architecture and external platform connectivity.

04 — Healthcare Intelligence & Automation

Data and intelligent technology capabilities intended to support better operational visibility and decision-making. Potential capability areas include business intelligence, operational analytics, workflow automation, decision-support capabilities and AI-enabled functionality, subject to validation and governance.

05 — Healthcare Ecosystem & Connectivity

An ecosystem-oriented approach that brings together providers, technology partners and complementary services. Potential capability areas include strategic technology partnerships, connected service networks, platform integrations, partner-enabled solutions and cross-organisation collaboration.

These pillars describe NEO's strategic business framework; they do not confirm that every capability is commercially available.

5. SOLUTIONS

Technology Designed Around Healthcare Needs.
NEO's solution strategy focuses on the operational, digital and connectivity challenges faced by healthcare organisations.

For Dental Practices

Digital practice management designed to connect clinical, administrative, financial and patient workflows. Featured platform: KHAYR.

For Healthcare Providers

A broader technology direction focused on helping healthcare organisations improve operational coordination, digital workflows and information management.

For Healthcare Organisations

Technology capabilities designed to support integration, data visibility, scalable systems and connected operations.

For Technology Partners

Collaboration opportunities around system integration, platform connectivity, digital solutions and complementary technology capabilities. CTA: Discuss Your Requirements. Specific solution availability depends on product maturity, implementation scope and technical validation.

6. OUR PRODUCTS

Purpose-Built Solutions. A Broader Healthcare Technology Vision.
NEO's product portfolio reflects its commitment to developing technology that addresses healthcare needs through focused solutions and complementary capabilities.

KHAYR — Digital Dental Healthcare Platform

KHAYR is NEO's flagship digital dental healthcare platform under development. It is being designed as a cloud-based Dental Practice Operating System to support connected workflows across clinical management and dental records; digital odontograms and treatment planning; patient relationship management; billing and financial management; inventory and procurement; and clinic and multi-branch management. KHAYR aims to help dental practices manage information and operations through a more structured digital environment.

KHAYR is under development. Product scope, feature availability, integrations and release timing are subject to validation and development progress. Do not represent planned integrations as live services.

NEOLYTE — Healthcare Hygiene Heritage

NEOLYTE represents NEO's historical healthcare hygiene product line, associated with hypochlorous-acid-based solutions and related application equipment. Further information about current product availability, technical specifications, regulatory status and commercial readiness will be provided only after verification. Current availability and regulatory status: to be confirmed.

7. TECHNOLOGY

Connected by Design. Built for Healthcare.
NEO's technology direction is centred on building adaptable digital platforms and connected systems that can respond to the evolving requirements of healthcare.

Technology principles

Integration by Design — We aim to reduce fragmentation through systems designed to connect with complementary technology environments.
Scalable Architecture — We pursue technology foundations that can evolve as products, users and operational requirements grow.
Security and Responsible Data Management — We recognise that healthcare information requires careful protection, controlled access and responsible handling.
Interoperability — We consider data exchange and system connectivity important elements of the healthcare technology environment.
Intelligent Workflows — We explore automation and data intelligence to support operational efficiency and informed decisions.

Technology development

Our development approach prioritises practical use cases, product validation, user experience, reliability and responsible implementation. Specific technology stacks, certifications, security controls and integrations should be published only after technical verification.

8. OUR APPROACH

Responsible Innovation. Practical Execution.
Healthcare technology must be developed with a clear understanding of its users, operational context and responsibilities.

Product development

We aim to follow a structured development process: understand healthcare needs and user workflows; define product requirements and intended outcomes; design and validate user experiences; develop and test product capabilities; evaluate

performance, usability and operational readiness; improve products through feedback and ongoing development.

Quality & Reliability

Our direction is to establish quality practices across product design, development, testing, implementation and support.

Security & Privacy

We recognise the importance of protecting healthcare and personal information. Our products and operating practices should be developed in line with applicable privacy, security and data-protection requirements.

Compliance & Governance

We aim to consider relevant legal, regulatory and industry requirements throughout product development and market expansion. Do not display certifications, regulatory approvals or compliance claims until supported by current documentary evidence.

9. PARTNERSHIPS

Creating Greater Impact Through Collaboration.
We believe the future of healthcare technology will be shaped by collaboration between healthcare providers, technology companies, institutions and innovators. NEO welcomes discussions with organisations that share our ambition to develop meaningful and connected healthcare solutions.

Healthcare Partnerships — Collaboration with clinics, healthcare providers and institutions to understand needs and explore digital solutions.
Technology Partnerships — Integration, interoperability, infrastructure and complementary technology opportunities.
Strategic Partnerships — Long-term business development and ecosystem collaboration.
Innovation Partnerships — Joint exploration, research, product validation and technology development.
CTA: Become a Partner.

10. INSIGHTS

Perspectives on the Future of Healthcare Technology.
Explore NEO's perspectives on digital healthcare, healthcare operations, interoperability, technology innovation and the development of connected healthcare ecosystems.

Editorial categories: Digital Healthcare; Dental Technology; Healthcare Management; Interoperability & Integration; Healthcare Intelligence; Company Updates.

Initial article topics: Why Healthcare Needs More Connected Digital Systems; The Role of Practice Management Technology in Modern Dentistry; Interoperability: Connecting Healthcare Information and Systems; From Digital Records to Intelligent Healthcare Operations; Building Responsible Technology for Healthcare. Articles must be authored, reviewed and approved before publication.

11. CONTACT & FOOTER

Let's Start a Conversation.
Whether you are exploring healthcare technology solutions, partnership opportunities or business enquiries, we would be pleased to hear from you.

Enquiry categories: General Enquiries; Business & Strategic Partnerships; Healthcare Solutions; Technology & Integration; Media & Corporate Enquiries; Careers.

PT Neomedika Elektra Optima. Corporate brand: NEO. Registered address, general email, telephone and website: to be confirmed.
