POSITIONING Integrated Healthcare Technology	**FLAGSHIP PRODUCT** KHAYR — under development
PRODUCT HERITAGE NEOLYTE — historical healthcare hygiene line	**PRIMARY MARKET** Indonesia | International ambition

Our corporate proposition

> **Building technology for a more connected healthcare future.**

NEO is designed as a corporate platform that can build, own and grow multiple healthcare technology products over time. The initial digital healthcare focus is dental care through KHAYR, while the wider strategy addresses healthcare management, patient-facing platforms, interoperability, intelligence and ecosystem connectivity.

EDITORIAL NOTE
Company address, establishment date, registration details, leadership, website and contact channels remain subject to internal confirmation.

02 / ABOUT NEO

A healthcare technology company with a long-term platform vision

Healthcare is increasingly shaped by information, operational efficiency, connected services and accessible digital experiences. Yet providers may still face fragmented systems, disconnected workflows and manual administrative processes.

NEO aims to address these opportunities by combining healthcare understanding, technology innovation and human-centred design. Our focus is to develop practical technology that supports providers, professionals and patients, while creating a scalable foundation for additional products and services.

Corporate positioning

An integrated healthcare technology company developing digital platforms, intelligent software and connected healthcare capabilities, with a global market ambition from inception.

ONE CORPORATE BRAND

NEO provides the enduring company identity, strategic direction and platform umbrella.

MULTIPLE PRODUCT POTENTIAL

Products can be developed, launched and evolved within the NEO brand architecture.

START WITH A CLEAR VERTICAL

KHAYR establishes the initial digital healthcare focus in dental practices.

BUILD TOWARD CONNECTIVITY

The longer-term ambition is an interoperable healthcare technology ecosystem.

03 / PURPOSE & DIRECTION

Vision, mission and corporate values

Vision

> **To help shape a more connected, intelligent and accessible healthcare ecosystem through technology, serving healthcare providers and patients across global markets.**

Mission

DEVELOP	Build useful healthcare technology that addresses real operational and clinical needs.
CONNECT	Enable better connectivity among providers, professionals, patients and healthcare services.
EMPOWER	Give healthcare teams practical digital tools to support their work and patient experience.
INTEGRATE	Promote secure, standards-aware interoperability between healthcare systems.
IMPROVE	Use data, automation and thoughtful design to support more efficient healthcare delivery.

Corporate values

INNOVATION WITH PURPOSE

Pursue innovation that addresses real healthcare challenges and creates practical value.

INTEGRITY & ACCOUNTABILITY

Operate with transparency, responsibility and respect for the trust placed in healthcare technology.

HUMAN-CENTRED DESIGN

Technology should support people, not make healthcare more complicated.

COLLABORATION

Work with healthcare professionals, technology specialists, institutions and strategic partners.

SECURITY & TRUST

Recognise the importance of protecting sensitive information and designing responsible technology.

CONTINUOUS IMPROVEMENT

Evolve through learning, validation and ongoing improvement.

04 / CORPORATE STRATEGY

A platform-led healthcare technology strategy

NEO's long-term strategy is to build a portfolio of healthcare technology products supported by shared technology capabilities, product development standards and strategic partnerships.

STAGE 1 — ESTABLISH

Develop and validate the initial digital healthcare platform, beginning with dental practice management and clinical workflows through KHAYR.

STAGE 2 — EXPAND

Develop patient engagement, multi-location management, analytics, automation, integrations and connected healthcare services.

STAGE 3 — CONNECT

Explore additional healthcare segments, strategic partnerships and selected international markets, subject to market validation and regulatory requirements.

Strategic principles

WORKFLOW FIRST	Build products around real healthcare workflows.
SCALABLE BY DESIGN	Prioritise adaptable technology and growing user requirements.
SECURE & INTEROPERABLE	Design with privacy, security and appropriate data exchange in mind.
VALIDATE BEFORE SCALING	Use measurable validation and implementation milestones.
PARTNER TO GROW	Establish partnerships that strengthen product quality and market access.
PORTFOLIO-READY	Maintain a corporate direction capable of supporting multiple products and business lines.

05 / BUSINESS PORTFOLIO

Five interconnected business pillars

NEO's strategic portfolio is organised around five business pillars. Together, they describe the capabilities and market opportunities the company intends to develop over time.

01

HEALTHCARE MANAGEMENT SYSTEMS

Clinic management, electronic medical records, practice management, scheduling, billing, inventory and multi-site administration.

02

DIGITAL HEALTHCARE PLATFORMS

Patient applications, appointment journeys, patient portals, digital records and engagement tools.

03

INTEGRATION & INTEROPERABILITY

Healthcare APIs, standards-aware data exchange, integration development for relevant platforms including SATUSEHAT where applicable, and third-party connectivity.

04

HEALTHCARE INTELLIGENCE & AUTOMATION

Operational analytics, reporting, workflow automation and future AI-enabled applications, subject to validation and safeguards.

05

HEALTHCARE ECOSYSTEM & CONNECTIVITY

Technology connectivity among clinics, hospitals, professionals, laboratories, pharmacies and healthcare service partners.

EDITORIAL NOTE
These pillars describe NEO's strategic business direction. They should not be interpreted as a statement that every capability is already commercially available.

06 / PRODUCTS & SOLUTIONS

A portfolio built around healthcare needs

KHAYR — Digital Dental Healthcare Platform

STATUS: UNDER DEVELOPMENT

KHAYR is NEO's flagship digital healthcare product and the starting point of its digital platform strategy. It is being developed as an integrated operating platform for dental practices, bringing together clinical documentation, clinic administration, financial workflows and patient experience.

CLINICAL MANAGEMENT & DENTAL EMR

Patient registration and profiles; clinical records and examination history; digital odontogram and charting; diagnosis and treatment history; treatment planning and clinical documentation.

CLINIC MANAGEMENT

Appointment scheduling; doctor and staff management; clinic and branch administration; operational workflow management.

FINANCIAL MANAGEMENT

Billing and payment workflows; treatment cost administration; financial and operational reporting.

INVENTORY & PROCUREMENT

Basic inventory management; stock visibility; procurement workflow support.

PATIENT RELATIONSHIP MANAGEMENT

Patient communication; appointment reminders and follow-up; patient treatment history and engagement.

INTEGRATION & INTELLIGENCE

External API connectivity; SATUSEHAT integration development where applicable; operational dashboards and multi-clinic visibility.

NEOLYTE — Healthcare Hygiene Product Heritage

NEOLYTE forms part of NEO's historical healthcare product development experience. The historical product brochure describes a water-based, alcohol-free sanitizer and disinfectant range developed using Hypochlorous Acid (HOCl) technology, together with complementary application equipment. Current availability, registrations, specifications and regulatory status must be confirmed before commercial or technical claims are made.

Future product development

NEO intends to explore additional healthcare technology products and services as capabilities develop and market opportunities are validated. Potential areas include broader clinic management platforms, specialist practice solutions, connected patient services, healthcare data and analytics, and interoperability services.

07 / TECHNOLOGY & INNOVATION

Technology designed around healthcare needs

NEO's technology direction is based on the principle that healthcare software must be practical, secure, adaptable and capable of supporting complex workflows.

SCALABLE ARCHITECTURE

Design systems with the ability to support growing user requirements, multiple clinics and additional product capabilities.

INTEROPERABILITY

Develop integration capabilities that enable appropriate data exchange with external systems and services.

DATA MANAGEMENT

Support structured information management, appropriate access controls and reliable operational records.

CLOUD-BASED DELIVERY

Explore cloud-based platforms to support accessibility, maintenance and scalable deployment.

HUMAN-CENTRED DESIGN

Design interfaces and workflows around healthcare professionals, clinic administrators and patients.

RESPONSIBLE INNOVATION

Evaluate automation and AI-enabled capabilities with appropriate human oversight, privacy protection and validation.

EDITORIAL NOTE
Specific technology stacks, infrastructure providers, certifications and deployed integrations should be disclosed only after internal technical confirmation.

08 / INDUSTRY & CUSTOMER FOCUS

Serving the healthcare provider ecosystem

NEO's initial digital healthcare focus is dental care, with a longer-term ambition to address broader healthcare technology opportunities.

INDEPENDENT DENTAL PRACTICES

Digital tools for patient records, clinical workflows, appointments and clinic administration.

MULTI-BRANCH DENTAL CLINICS

Centralised operational visibility, standardised workflows and multi-location management.

DENTAL HEALTHCARE GROUPS

Technology foundations that may support larger-scale administration, reporting and integration requirements.

Geographic focus

The initial market focus is Indonesia, with early commercial market discovery intended to concentrate on selected cities in Java, including Greater Jakarta, Bandung, Semarang and Yogyakarta. International markets may be considered through localisation, partnerships and jurisdiction-specific compliance assessment.

Future market exploration

NEO may explore opportunities in general practice, specialist clinics and other healthcare provider segments as product capabilities and market readiness develop.

09 / BUSINESS MODEL

Creating value through technology and partnerships

NEO's intended commercial model combines recurring technology revenue with implementation and strategic service opportunities.

SOFTWARE SUBSCRIPTION

Recurring subscription fees for digital healthcare platforms, based on product modules, clinic size or service tier.

IMPLEMENTATION & ONBOARDING

Fees for configuration, migration, training and deployment support where applicable.

ENTERPRISE LICENSING

Commercial arrangements for larger healthcare groups or multi-location customers.

INTEGRATION SERVICES

Project-based fees for approved integrations and technical implementation.

STRATEGIC PARTNERSHIPS

Potential commercial arrangements with healthcare institutions, technology providers and distribution partners.

EDITORIAL NOTE
Actual pricing, revenue mix and commercial terms will be established through market validation and approved product offerings.

10 / OPERATING MODEL

A multidisciplinary healthcare technology business

NEO's intended operating model brings together the capabilities required to research, design, develop, implement and support healthcare technology products.

BUSINESS & CORPORATE STRATEGY

Corporate planning; business development; strategic partnerships; finance and governance.

PRODUCT & TECHNOLOGY

Product management; software engineering; UI/UX design; cloud and infrastructure; integration and cybersecurity.

HEALTHCARE & CLINICAL ADVISORY

Clinical workflow review; healthcare domain expertise; product validation; quality and compliance input.

CUSTOMER & OPERATIONS

Customer onboarding; training and support; implementation management; account management; service operations.

EDITORIAL NOTE
Specific leadership appointments, staffing levels and organisational reporting lines will be inserted after internal confirmation.

11 / QUALITY, SECURITY & COMPLIANCE

Building trust through responsible technology

NEO recognises that healthcare technology operates in an environment where information privacy, data security, reliability and regulatory compliance are essential.

INFORMATION PROTECTION	Appropriate protection of personal and sensitive information.
ACCESS CONTROL	Role-based access and permission management.
AUDITABILITY	Traceability of relevant system activities and changes.
SECURE OPERATIONS	Secure system design, infrastructure management and appropriate backup and recovery planning.
REGULATORY ASSESSMENT	Review of applicable Indonesian personal data protection, electronic system and healthcare technology obligations.
MARKET-SPECIFIC COMPLIANCE	Assessment of privacy, cybersecurity and healthcare requirements in each jurisdiction.

EDITORIAL NOTE
Any specific certifications, regulatory approvals, registrations or compliance achievements must be inserted only after documentary verification.

12 / GROWTH ROADMAP

A staged approach to sustainable growth

PHASE 1	**DIGITAL DENTAL FOUNDATION** Develop and validate KHAYR's core dental clinic workflows and operational platform.
PHASE 2	**PLATFORM EXPANSION** Enhance patient experience, multi-clinic capabilities, analytics, automation and strategic integrations.
PHASE 3	**HEALTHCARE SEGMENT EXPANSION** Explore general clinic and specialist clinic solutions, broader EMR capabilities and connected services.
PHASE 4	**INTERNATIONAL ECOSYSTEM DEVELOPMENT** Evaluate selected international markets, localisation requirements and strategic partnerships.

EDITORIAL NOTE
This roadmap represents strategic intent and is subject to product readiness, market validation, funding and regulatory assessment.

13 / PARTNERSHIP ECOSYSTEM

Building through collaboration

NEO believes that meaningful healthcare technology development requires collaboration across healthcare, technology and commercial sectors.

HEALTHCARE PROVIDERS

Dental practices, clinics, hospitals and healthcare groups interested in digital transformation and product validation.

CLINICAL ADVISERS & PROFESSIONALS

Healthcare professionals contributing domain expertise, workflow review and clinical product feedback.

TECHNOLOGY PARTNERS

Cloud infrastructure providers, software developers, cybersecurity specialists and integration partners.

COMMERCIAL & IMPLEMENTATION PARTNERS

Organisations supporting market access, deployment, training and customer success.

INVESTORS & STRATEGIC PARTNERS

Partners aligned with scalable healthcare technology products and long-term business opportunities.

14 / CORPORATE GOVERNANCE

Responsible corporate development

NEO intends to develop its corporate governance framework in line with the scale, complexity and regulatory requirements of its business.

STRATEGY & OVERSIGHT	Corporate strategy, decision rights and management accountability.
FINANCIAL CONTROLS	Financial planning, budgeting, reporting and internal controls.
RISK MANAGEMENT	Identification, assessment and monitoring of operational, technology and business risks.
IP & CONTRACT MANAGEMENT	Clear ownership and management of intellectual property, contracts and commercial rights.
DATA & COMPLIANCE OVERSIGHT	Oversight of data protection, information security and regulatory obligations.
PRODUCT ACCOUNTABILITY	Clear accountability for product development, validation, implementation and support.

EDITORIAL NOTE
Legal structure, shareholder information, board and management composition should be included only after formal confirmation and approval for disclosure.
